

With its innovative components and system solutions, BARTEC has achieved a top position among the world's suppliers of visualization technology. Consistent product updating and further development form the basis of new solutions for new fields of application and for greater usability and safety. Our POLARIS Human Machine Interface series is the intelligent answer to increasingly complex processes and higher demands on the functionality of machines and systems.

### Perfect for harsh industrial environments in Ex areas

With POLARIS, BARTEC offers a complete and continuous HMI portfolio and first-class devices and solutions for all tasks related to process visualization as well as operation and monitoring.

From control units and visualization software for machine-oriented operation and monitoring to the all-rounder open system for the most diverse requirements in process visualization – all POLARIS devices are robust, compact and offer a wide variety of connection possibilities.

LED technology and daylight suitability ensure brilliant images and the utmost of comfort even in unfavourable lighting conditions. For safe and intuitive operation you can choose between keypad and touchscreen.

### POLARIS system features

#### ■ HMI/PC and remote solutions

For integration in various automation structures

#### ■ Remote solutions

KVM (real time)  
ZeroClient (Remote PC)

#### ■ PC solutions

Open Windows OS

#### ■ HMI solutions

With its own, efficient visualisation software

#### ■ Different sizes of display

Classic and wide format  
Compatible with many industrial standards

#### ■ Matching peripherals

Different versions of keyboard and mouse  
Bluetooth and Wi-Fi  
Scanner  
Enclosure system solutions

POLARIS is available not only in a standard version but also as a customized solution. Just ask us!
